Languages

Russian language level native speaker.

English language level Pre-Intermediate, but practice and improvement of your skills is always needed.

About myself

As an IT graduate, I am a competent programmer who has taken it upon myself to enhance my knowledge and skills by learning additional coding languages. As I love working a team, I am looking for a team-based, challenging and creative role where I can use and develop all of my skills. I am always open to new challenges and experiences and would eventually like to work abroad.

I am sociable and have been told I'm a great listener. I find it easy to learn when I have a good mentor. I have a great desire to become a developer.

In my free time, I love to walk and ponder all life's nuances. I love to read a good instructive article on my computer, or to play or watch a high-quality game or movie.

Motto: Everything in life is difficult, but how sweet success is.

My strengths:

- Strong and serious character;
- I am very grateful and appreciative of my real friends and people around me;
- I quickly adapt to interesting tasks.
- I don't like to lose.

My weaknesses:

- I do like to daydream from time to time;
- I can be afraid of what I don't know;
- I have a tendency to be a little introverted.

Skills

- Mastered languages at the **basic** level: JAVA Core, Microsoft SQL.
- Have worked with PHP, CSS, HTML, C++.
- Mastered additional programs Photoshop, Sony Vegas.
- Confident user of Office programs.
- Motivated to learn.
